RG104 E-1 Box 121

Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 29th July —, *1880.*

Sir,

Having reported on the 22nd July that Dr A. Griffiths' apparatus for saving wastage was worth testing by practice, I find that there is sufficient room to erect the necessary works for testing it. There is not sufficient certainty in the successful working of the apparatus to warrant the Government bearing any cost in the test. I therefore recommend that the apparatus of Dr Griffiths be put up, and its working tested in this Mint, entirely at the cost of Dr Griffiths, provided it do not interfere in the least with the Government work, and provided it shall be removed without cost to the Mint, at whatever time the Superintendent shall so order.

Very Respectfully yours
I. A. C. Booth

Hon. A. Loudon Snowden
Superintendent.
